

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A floodlight comprising:

means for generating convergent ~~beams each beam~~ having a respective central axis (AA), axis;

a lens array ~~comprising a plurality of lenses located~~ substantially around said ~~respective central axis, axis for~~ receiving the convergent beam; and

means for moving said lens array with respect to said ~~generating means by a reduced distance relative a distance a single lens is moved by an increased distance, the single lens having a same size as the lens array and generating a same light effect when the single lens is moved by the increased distance and when the lens array is moved by the reduced distance, so that a size of the~~

~~floodlight is reduced as compared to a single lens floodlight for generating the same light effect.~~

2. (Currently Amended) The floodlight as claimed in claim 1, wherein said moving means are adapted to move said lens ~~array~~ in a direction parallel to said ~~respective~~ central axis.

3. (Currently Amended) The floodlight as claimed in claim 1, wherein said moving means are adapted to move said lens array in a direction perpendicular to said ~~respective~~ central axis.

Claim 4 (Canceled)

5. (Previously Presented) The floodlight as claimed in claim 1, wherein said means for generating a convergent beam comprise a light source, collimating means and a convergent lens.

Claim 6 (Canceled)
